CHI Learning & Development (CHILD) System

Project Title

Improving Pain Assessment and Documentation

Project Lead and Members

Project lead: Melvin Khor

Project members: Ivy Reyes, Muhammad Naufal, Muhammad Hafiz, Marina Iskandar,

Rosidah Idris, Glenda Tan, Cindy Lee, Dr Jasmine Lim, Ms Ng Wei Wei

Organisation(s) Involved

Ng Teng Fong General Hospital

Healthcare Family Group(s) Involved in this Project

Nursing, Medical

Applicable Specialty or Discipline

Inpatient Wards

Project Period

Start date: Jan 2023

Completed date: Apr 2023

Aims

In 6 months time, documentation of pain assessment to be accurate.

- Timely interventions for patients with pain score of > 4 and its follow-up by improving pain assessment and documentation through escalation protocol.
- Achieve patients, with pain score of < 4, to reduce pain score by nursing interventions.
- Improving compliance to prescribed analgesia in EMAR.
- Ensure compliance rate of post analgesia intervention, documentation.

Background

See poster attached/ below

Methods

See poster attached/ below

Results

See poster attached/ below

Lessons Learnt

Staff are more receptive to pain assessments with visual aid, improving communication and patient pain control. Pain score ruler and escalation system shorten time and improve patient outcomes.

Conclusion

See poster attached/ below

Project Category

Training & Education

Education Platform, Virtual Learning Platform, Physical Learning Platform

Keywords

Quality Improvement, Pain Assessment, Documentation, Pain Score, Analgesia, Escalation

IMPROVING PAIN ASSESSMENT AND DOCUMENTATION.

PROJECT SPONSOR: DR JASMINE LIM, MS NG WEI WEI. TEAM MEMBERS: MELVIN KHOR, IVY REYES, MUHAMMAD NAUFAL, MUHAMMAD HAFIZ, MARINA ISKANDAR, ROSIDAH IDRIS, GLENDA TAN, CINDY LEE

Define Problem, Set Aim

Problem/Opportunity for Improvement:

During the pain audit, pain documentation was found to be lacking in description and accuracy. This is identified as an area of improvement.

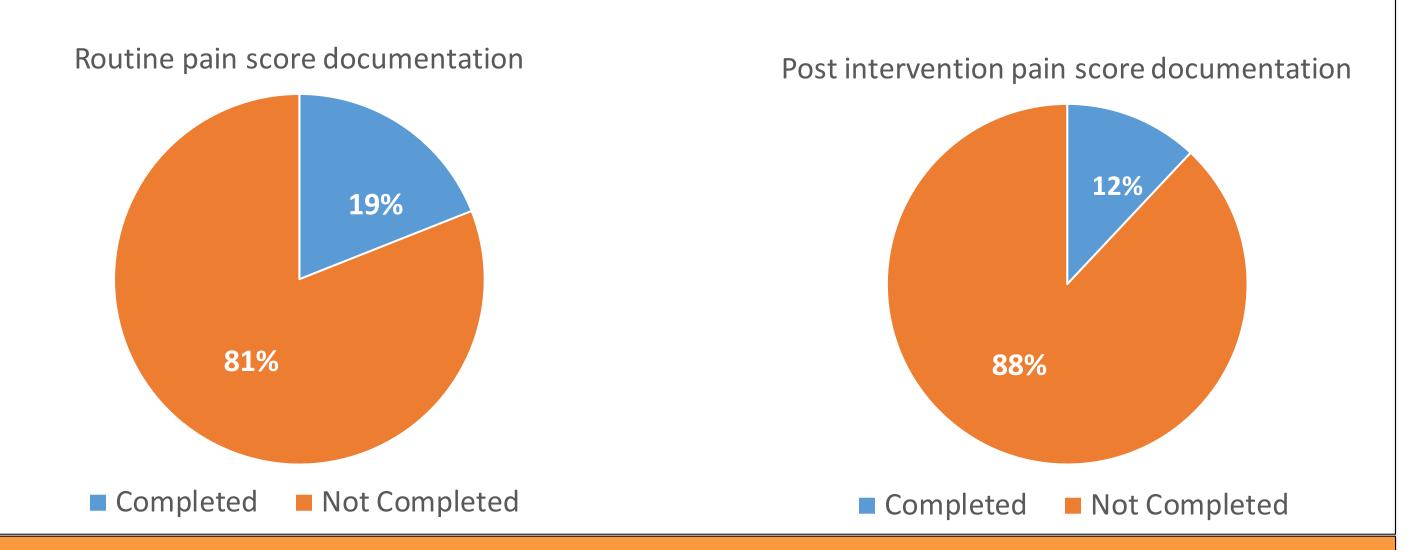

Aim.

- In 6 months time, documentation of pain assessment to be accurate.
 - Timely interventions for patients with pain score of > 4 and its follow-up by improving pain assessment and documentation through escalation protocol.
 - Achieve patients, with pain score of < 4, to reduce pain score by nursing interventions.
 - > Improving compliance to prescribed analgesia in EMAR.
 - Ensure compliance rate of post analgesia intervention, documentation.

Pre-audit results

09/01/23 – 22/01/23; 2 weeks of data collection of pain documentation during Vital-sign rounds and pain documentation post-intervention (if any, i.e. serving of analgesia in EMAR). Data collected in Ward B9 and B10.

Total of 369 data was collected.

Timeline of Implementation

January

- Pre-Audit done for Ward B9 and B10. Done by each ward representative.
- Discuss methodology to improve on compliancy rate of documentation by QI Team member.

February

- Discuss teaching plan to educate ward staff on pain management and documentation in routine vitals.
- PowerPoint slides created and Educational video discussed

March

- Pain ruler gave out to respective Wards and ward representative educated staffs on compliancy of pain documentation during Vital-signs round.
- Begin auditing Wards B9 and B10 on routine pain documentation during Vital-signs rounds and documentation after intervention done (i.e: Serving of analgesia).

April

- PDSA was adopted to analyze data and work on improving the process.
- Submitted findings to Nurse leader and presentation to Ms Ng Wei Wei and Dr Jasmine.

May

- Educational video and slides prepared to upload in E-LEARN.
- Presented case to Nursing Leader Meeting.

Test & Implement Changes

Teaching slides was created to facilitate these 4 wards and was conveyed during role calls, for 2 weeks (06/02/23 - 19/02/23). Educate staffs using the flow diagram below for pain assessment and its intervention.

Total of 418 data is collected.

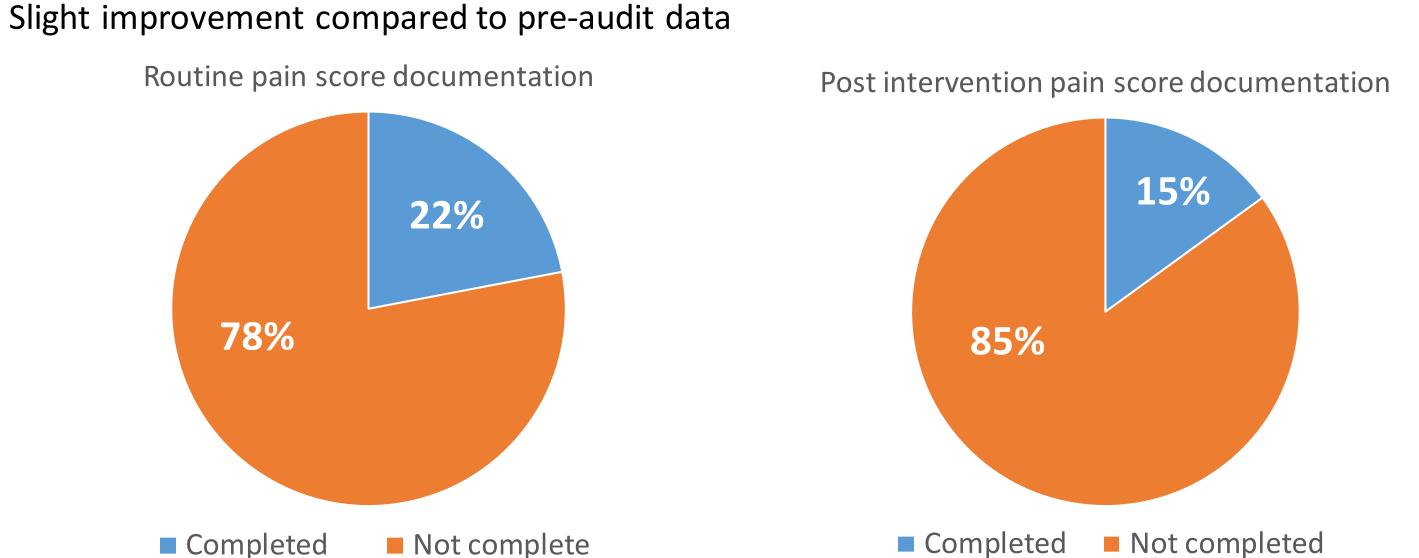

Implemented pain score ruler on (20/03/23 - 02/04/23). Gave out to respective ward staffs for easy reference and usage during Vital-sign rounds

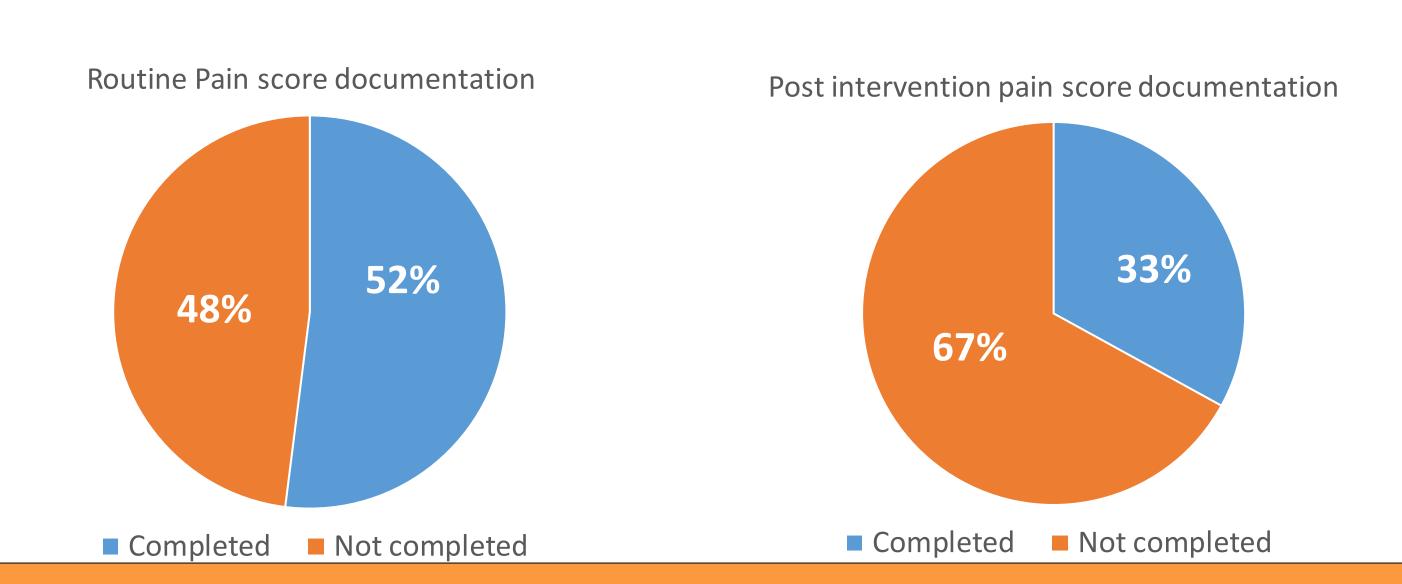

Results

20/02/23 - 05/03/23: Implement of Teaching slides.

22/03/23 – 02/04/23: Implement of pain score ruler (visual aid).

Post implement visual aid statistics show significant improvement, with routine compliance rate reaching 52% and post-intervention domain improving to 33%.

Spread changes, Learning Points

What are/were the strategies to spread change after implementation?

Presented data to Nursing Leader Meeting and its improvement.

Spread to JHC with the help of clinical instructor form T&D and project team member. Uploaded teaching slides and Video into E-Learning.

What are the key learnings from this project?

Staff are more receptive to pain assessments with visual aid, improving communication and patient pain control. Pain score ruler and escalation system shorten time and improve patient outcomes.
