

### Project Title

Reference Guide to Overcome Language Barrier

### **Project Lead and Members**

Project lead: Siti Jaslina Binte Mohamed Sadhi

Project members: Zaiton Bintemohd Salleh, Nur Amalina Binte Haifi, Lim Chwee Har,

Anna Chee Cheo Tee, Kalimuthu Veerasenan, Kasthuri

### **Organisation(s) Involved**

Jurong Community Hospital

### Healthcare Family Group Involved in this Project

Healthcare Administration

### **Applicable Specialty or Discipline**

Patient Service Associate, Patient Greeter

### **Project Period**

Start date: Aug-2017

#### Aims

To improve communication between visitors and staff on duty. As such, waiting time can be shorten, resulting in increased visitor satisfaction.

### Background

See poster appended / below

### Methods

See poster appended / below

### Results

See poster appended / below

#### **Lessons Learnt**

Use of visual diagrams and universal language such as numbers and pictures can help improve communication.

### Conclusion

See poster appended / below

### **Project Category**

Care & Process Redesign, Quality Improvement, Job Effectiveness, Access To Care, Waiting Time, Value Based Care, Patient Satisfaction

### Keywords

Language Barrier, Visitor Registration, Communication, Translated Reference Guide

### Name and Email of Project Contact Person(s)

Name: Gwendolyn Shepherdson

# **REFERENCE GUIDE TO OVERCOME** LANGUAGE BARRIER

SITI JASLINA BINTE MOHAMED SADHI, ZAITON BINTEMOHD SALLEH, NUR AMALINA BINTE HAIFI, LIM CHWEE HAR, ANNA CHEE CHEO TEE, **KALIMUTHU VEERASENAN, KASTHURI** 

## SAFETY PRODUCTIVITY **PATIENT EXPERIENCE** QUALITY VALUE

# **Define Problem, Set Aim**

## **Opportunity for Improvement**

- Some of the elderly visitors and foreigners are unable to communicate in English.
- Staff on duty (Patient Greeter / JCH PSA) may not speak the same mother tongue as these visitors therefore a communication breakdown occurs.
- These have resulted in longer waiting time for visitors who are in the queue.

# **Select Changes**

## What are the probable solutions?

- To address the root cause of staff of different language capability on duty, a solution was implemented - To create a translated ward/ bed number reference guide in three different languages (English, Mandarin & Malay).

|            |             |                |

The main objective of the project is to improve communication between visitors and staff on duty. As such, waiting time can be shorted, resulting in increased visitor satisfaction.

## **Establish Measures**

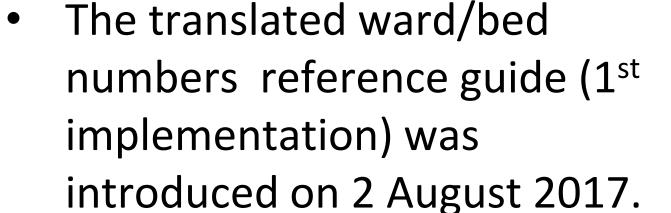

### Registration time per visitor

Approx **10 minutes** to complete registering visitors if there is a delay due to communication problem and language barrier

### Staff service competency

Only **2 out of 10 staff** on duty (PG / JCH PSA) are able to speak either Chinese or Malay without a translated reference guide.

## **Analyse Problem**

## **Test & Implement Changes**

## **Translated ward/bed number** reference guide with picture

## and header

After 1<sup>st</sup> implementation, a few feedback were received on the picture used and no translation for the headers. Therefore a 2<sup>nd</sup>implmentation was introduced.

## 2<sup>nd</sup> Implementation

## **Post Implementation Issues**

- Ward/ Bed number reference guide was useful however patient greeters continued to face communication breakdown
- Hence, patient greeters worked together with JCH PSAs on a translated guide of commonly used questions during visitor registration.

## **Determining the Root Cause (5 WHYS)**

## Unhappiness among visitors at the visitor registration counter

## **Dissatisfied with long waiting time**

## Unable to communicate effectively with staff

## Language barrier between visitors and staff

## **Translated Flash picture cards on**

## common questions asked by visitors

- Translation of common questions which staff on duty will ask visitors
  - upon registration
- Pictures are included in the flash cards for visitors

### Improved performance after implementation

- Both the translated ward/bed number reference guide and flash picture cards has helped improved communication between staff and visitors.
- Shorter and more seamless registration time Approx 5 minutes to complete registration by referring to the guide
- Staff on duty are able to promptly assist visitors and improvement in service standards - 7 out of 10 staff on duty are able to register successfully on their own referring to the guide

# **Spread Changes, Learning Points**

## Limited language capabilities of staff

WHY?

## Due to operational requirements and rostering, may not have staff of different language capabilities on duty

## **Spread change**

The translated reference guide is used in both Lobby Management areas and JCH outpatient.

## **Key learnings**

- Use of visual diagrams as tool can help improve communication
- Universal language such as numbers and pictures is useful in communication
